International Journal of Fracture

CONTENTS OF VOLUME 71 (1995)

Vol. 71, No. 1, 1995

Statistical character of the failure of multiphase materials due to high pressure water jet impingement	A.W. MOMBER and R. KOVACEVIC	1–14
An edge dislocation of constant velocity near a static internal crack	YU-ZEN TSAI, C.T. HU and SANBOH LEE	15–35
On some general properties of strength criteria	L.N. GERMANOVICH and G.P. CHEREPANOV	37–56
A special bending crack tip finite element	C.P. JIANG and Y.K. CHEUNG	57–69
Analysis of shear localization in porous materials based on a lower bound approach	Y. SUN and D. WANG	71–83
Effective elastic moduli in fiber-reinforced composite with circular-arc-shaped interfacial cracks	S.Y. KIM, H.J. MOON and Y.Y. EARMME	85–93
K-dominance for a pressurized Griffith crack	A. ROMEO and R. BALLARINI	95–97

Vol. 71, No. 2, 1995

Coating cracks in materials with general anisotropy	C. BLANCO, J.M. MARTÍNEZ-ESNAOLA, C. ATKINSON and J.M. BASTERO	99–130
Application of the biaxial Iosipescu method to mixed-mode fracture of unidirectional composites	A. BANSAL and M. KUMOSA	131–150
Asymptotic stresses around a crack tip at the interface between planar or cylindrical bodies	N.J. PAGANO and A.K. KAW	151–164
Elastoplastic crack analysis by boundary integral method and surface spectrum measurement	J. SLADEK, V. SLADEK and M. DRZIK	165–176
Asymptotic crack-tip fields in anisotropic power law material under antiplane shear	X. CAI and F.G. YUAN	177–195

Vol. 71, No. 3, 1995

Antiplane strain problem of diamond inclusion	D.-H. CHEN	197–212
Driving force analysis in an infinite anisotropic plate with multiple crack interactions	W.K. BINIENDA and S.M. ARNOLD	213–245
On the scale effect in the thin layer delamination problem	M. RYVKIN, L. SLEPYAN and L. BANKS-SILLS	247–271
Quantifications of crack constraint effects in an austenitic steel	H. YUAN, G. LIN and A. CORNEC	273–291

Vol. 71, No. 4, 1995

Bimaterial plane with elliptic hole under uniform tension normal to the interface	M. OKUMURA, N. HASEBE and T. NAKAMURA	293–310
A point force and an edge dislocation in an elliptical inclusion embedded in an infinite medium	D.-H. CHEN	311–322
Evaluation of elastic fracture mechanics parameters for bend specimens	A. BAKKER	323–343
Fracture parameters for interfacial cracks: an experimental-finite element study of crack tip fields and crack initiation toughness	L. XU and H.V. TIPPUR	345–363
Three-dimensional stability analysis of planar straight cracks propagating quasistatically under type I loading	R.C. BALL and H. LARRALDE	365–377
Boundary element study on the optical method of caustic for measuring fast crack propagation toughness K_{ID}	S. AOKI, Y. NONOYAMA and K. AMAYA	379–390
